

Sysco is designed to make offices more open, interactive and cohesive workplaces. An integration of partitions, work surfaces, storage options, invisible wire management and accessories, all tailored to your specific needs . . .

### INTEGRATED SYSTEM

- Partitions
- Work Surfaces
- Storage Options
- Wire Management
- Accessories

#### PARTITIONS

Partitions give people the privacy they need. Partitions consist of panels and a unique connector system designed for easy assembly. The panels come in different levels of privacy such as visual access, seated privacy, standing privacy, and full height partitions.

#### WORK SURFACES

Worksurfaces are designed in different shapes and sizes to suit any work environment. They are available in a variety of colored laminates with superior PVC edging to impact extra durability.

#### STORAGE OPTIONS

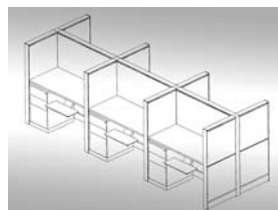

Various storage options in different configurations are provided to suit individual needs. Pedestals are available in metal or in matching colored laminates.

#### WIRE MANAGEMENT

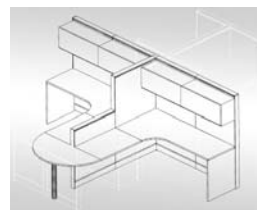

Cabling may be located at the base and at various heights throughout the panels.

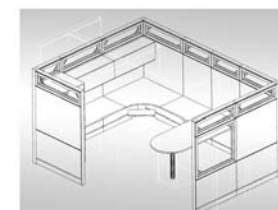

Sysco's open plan system provides an aesthetic environment through various colors, and increased office productivity that encourages open communication.
